## Notice of Results of Sanitation Districts' Industrial Waste Monitoring

Attached please find the results of recent Sanitation Districts' wastewater sampling at your company's discharge sewer corresponding to the permit shown on the analysis sheet.

This sampling was made pursuant to Section 414 of the Sanitation Districts' *Wastewater Ordinance* as part of a random verification monitoring program conducted at significant dischargers of industrial wastes. The District's sample results are being provided to you to make you aware of any changes at your facility which may result in higher than anticipated industrial waste discharges to the sewerage system. It is your responsibility to investigate any differences in the wastewater sample results provided by the Districts and the results of your self-monitoring. For companies that file long form surcharge statements, these Districts-obtained sample results should be combined with your wastewater self-monitoring results on the annual wastewater treatment surcharge statement.

As stated in the Districts' *Connection Fee Ordinance*, after December 15, 1981 a 25 percent increase in wastewater discharge (quantity and/or quality) above your company's previous wastewater discharges during the 1976-77 through 1981-82 fiscal years may require that your company purchase additional sewer discharge rights. For wastewater capacity increases that occur during the 2001-02 fiscal year, this connection fee charge ranges from \$1,061 to \$1,760 for wastewater capacity increases equivalent to that of a typical single-family home (260 gallons per day).

These Districts-obtained sample results will be used, along with your wastewater self-monitoring results, in determining your capacity usage of the sewerage system and the validity of data submitted in your annual surcharge statement. Transmittal of these data to you at this time does not relieve your company of the responsibility to obtain all of the self-monitoring samples required in your Industrial Wastewater Discharge Permit.

If you have any questions about this program for furnishing industrial wastewater discharge information, please call Wilfrido Mejia at extension 2958.

Very truly yours,

James F. Stahl
